

MobilTM						Caution					
						Unit ID: 351.BE350 L			Asset ID: 51526790		
						Description: Bucket Elevator GB - L					
Account Information						Sample Information			Equipment Information		
ID: 208948						Sample ID: 26123350238			Asset Class: Gear Drive		
Name: Reliance Heavy Industries						Service Level: Enhanced			Manufacturer: FLENDER		
Address: Kattameya-Sokhna Road, Suez, 00000 EG						Bottle ID: b105154826			Model: N/A		
						Tested Lubricant: MOBIL SHC 632			Lubricant: MOBIL SHC 632

Recommendation/Comments		
ADMINISTRATION - PARTICLE COUNT DATA NOT REPORTED. The sample is heavily contaminated with visible sediment. Oil samples that contain significant levels of any contaminant can damage the laboratory's precision equipment. As a result, the particle count test was not completed, and analysis could not be provided. Before sending future samples to the laboratory, please ensure that no signs of visible sediment contamination are present. Consider the following: 1. The sample may not be representative of the system if it was acquired from a non-turbulent area (i.e. tank bottom); 2. Installing sample ports helps ensure that the sample is taken from the same location every time; 3. Tank fill caps and breathers might not be properly secured; 4. The filter / centrifuge may be operating incorrectly. If the sample was representative of the system, change the oil immediately to prevent equipment damage. Contact your ExxonMobil representative for further assistance if necessary.
